08:09:15   From Carla Birckelbaw : Good morning all! We will be starting CIT at 8:30 this morning.
08:27:38   From Bill Hamann to Carla Birckelbaw(Direct Message) : not I
08:28:35   From Tony Brook : Morning all! :)
08:28:42   From Matthew Gromer : Mornin'!
08:30:04   From Charles Edamala (CIO, Illinois State) : Morning all
08:30:21   From Charles Bristow : Greetings.
08:30:23   From Skylier Wallace : Morning! :D
08:33:16   From Tyler Piper : I need bits. How do I buy them?
08:33:37   From George Wiman : Gooooood Morning ISU!!!
08:33:45   From Greg Maier : 'morning, everyone
08:35:27   From Charles Bristow : @Tyler - go to allyourbits.com - they deliver.
08:35:36   From Tyler Piper : :)
08:40:09   From Jeff Grabb : Yup ,now we can hear ;)
08:40:54   From Colten Keeling : give us Faker! :P
08:42:06   From Nathan Stien : StarCraft was the first and still best esport, prove me wrong kids
08:42:32   From Brian Bertalot : I think some of these hosts in the video have never heard of the greatness known as G4TV. And that was nearly 20 years ago that it came on the scene.
08:42:54   From Liam Doherty : Sorry Nathan, I'm still a Stan for Q3A
08:43:08   From Nicholas Flamini : I remember watching G4TV for E3 coverage every year
08:43:56   From Nathan Carpenter : We have an alumna who covers LCS: https://news.illinoisstate.edu/2020/02/alumna-creates-her-own-lane-in-growing-esports-field/
08:43:56   From Tyler Piper : Starsiege Tribes is the best esports game. Nathan is probably right with SC1 but I wasn't good at it so it doesn't count imo :)
08:44:22   From Nathan Stien : Q3A came out years after StarCraft and still can't match the eleventy dimensional speed chess challenge of telling the little aliens what to shoot
08:44:44   From Brian Bertalot : In the past several years, there have been pushes to bring Esports to the world Olympics scene. :)
08:45:15   From Ben Rappleyea : My uncle did voices for StarCraft II but not StarCraft sadly
08:45:17   From Tyler Piper : SC1 = Chess but each player can move all of their pieces at the same time and not take turns while also making more pieces.
08:45:46   From Greg Maier : StarCraft 2 was in the Olympics, but as a special event (can't remember the category)
08:46:43   From Matthew Gromer : HoTS woo
08:47:21   From Tyler Piper : I came in 2nd on the Heroes of the Dorm bracket contest. The pc was pretty nice.
08:47:52   From Paul Unsbee : 1982 arcade championships <opens the door to boomer jokes>. Give me a good retro high score comp anytime. Chasing Ghosts is a great documentary on that era.
08:48:31   From Nathan Stien : I used to attend Street Fighter II and Moral Kombat (original) tournaments at the local arcade. And lose handily to older kids who had more quarters
08:48:34   From Tyler Piper : That is a very good documentary, Paul. Even my kids liked it.
08:49:01   From Tyler Piper : The early days of pay to win, Nathan. :)
08:49:02   From Matthew Gromer : The original pay-to-win mechanic. :p
08:49:31   From Tyler Piper : Get out of my head, Matt.
08:50:10   From Greg Maier : (King of Kong is a great documentary about the arcade competitive scene.)
08:50:46   From Majeed Abu-Qulbain : Wonder if the game publisher / Control issue will lead to any large scale community driven open source game development to support esports.
08:51:04   From Majeed Abu-Qulbain : Hard to see, but would be cool
08:51:09   From Cristian Sandu : neat, congrats on the recruit
08:51:40   From Brian Bertalot : As long as we all agree that Billy Mitchell is a fraud :P
08:52:11   From Greg Maier : There might be a "soccer" esport some day (cheap entry for mass appeal) but it doesn't seem at all likely anytime soon
08:52:25   From Nathan Stien : Arguably that's Rocket League
08:52:28   From Tyler Piper : The student that plays for C9 now goes by 'Tempos' for anyone that watches. He is in their Academy program now.
08:52:51   From Greg Maier : Rocket League is still developed by a company =)

08:52:52   From Tyler Piper : His name is Spenser.
08:52:53   From Liam Nance-Carroll : How do you make sure there is a level playing field and high ethical standards when the publisher can change the rules of the game at anytime and there are so many other avenues for profit?
08:53:07   From Paul Unsbee : I gotta think a there's got to be some future for open source maintenance of code and rules (both game code and server code) for some eSports game. Just to keep them available and viable beyond any one companies success/failure.
08:53:18   From George Wiman : Not that the $$$ is the only reason for a field to exist
08:53:20   From Nathan Stien : a former student worker on my team (Brian Jesse) now works on Rocket League
08:53:49   From Ron McGettrick : I am love playing the Battlefield (BF4 and BF1) series created by Dice and EA.   The sad part this game only has a competitive league in Europe.
08:54:21   From Brian Bertalot : That's pretty awesome, Nathan!
08:54:22   From Greg Maier : StarCraft was once the national sport of Korea until a Black Socks like scandal hit the scene. Still very popular but it never regained the mass popularity
08:54:46   From Nathan Stien : I still stream Korean TV of SC2 tournaments; they just had the 2020 finals this weekend :-)
08:55:38   From Cristian Sandu : heh nice ssb ref
08:55:41   From Greg Maier : The only events I watch are some SC2 tournaments and The International of DOTA
08:56:46   From Justin Brutlag : Nice Smash brothers reference in the slide
08:57:02   From Nathan Stien : oh! I was thinking there was a Side Show Bob reference I was missing
08:57:21   From Cristian Sandu : ssb = super smash bros
08:58:11   From Greg Maier : (The International for me is how many who watch the Superbowl experience it--I have no idea who the players are but that's okay.)
08:58:17   From Liam Nance-Carroll : Nathan is was also thinking Side Show Bob and not getting it
08:58:41   From Cory Starr : GoldenEye needs a port and league
08:58:53   From Ron McGettrick : Are our ISU Esports team is this a club level team or are the players on team on scholarship ?
08:58:58   From Cristian Sandu : slappers only league*
08:59:07   From Cory Starr : Correct
08:59:10   From Justin Brutlag : #nooddjob
08:59:46   From Liam Nance-Carroll : GoldenEye single elimination in the dorm
08:59:51   From Steve Hastings : So I was not wasting time by playing Wizardry on the Apple IIs while working at Milner in the dark ages :) I was blazing a trail.
08:59:58   From Nicholas Flamini : We have 3 Varsity teams (League, Overwatch, and Rocket League). There is also some club teams for other games!
09:00:56   From Ryan Dwyer : In addition to varsity teams, there are club teams for any student to participate in those games
09:01:01   From Paul Unsbee : I think I may have been behind the camera on that pic!
09:01:17   From Kevin Hand : Man that DIGGS room seems sharp.
09:01:26   From Ron McGettrick : So are the Varisity team player are they on scholarship similar to other collegiate sports like football ?
09:01:42   From Ryan Dwyer : I believe so, Ron
09:01:58   From Ron McGettrick : thanks
09:01:59   From Brian Bertalot : specs on the gaming computers?
09:02:33   From Ryan Dwyer : 240hz gsync monitors :D
09:02:38   From Tyler Piper : They are a few years old, Brian. I want to say they are i7's with GTX 1080's. 16gb of ram.
09:02:52   From Liam Doherty : I think the DIGGS machines were 8-series i7's and 1070 Supers.
09:03:01   From Brian Bertalot : M.2 SSD?
09:03:01   From Cristian Sandu : well if they're tossing'em I'll take one :/
09:03:10   From Cristian Sandu : "old"
09:03:17   From Greg Maier : Can't imagine they're not using SSDs =)
09:03:34   From Carla Birckelbaw : Richie, can you share the DIGGS machine specs?
09:04:09   From Kevin Hand : i5 8400s, 32GBRAM, GeForce GTX 1070ti
09:04:12   From Jonathon Neff : Looks similar to my setup (with less monitors)

09:04:20   From Tony Brook : That is a REALLY nice looking space.
09:04:28   From Majeed Abu-Qulbain : agreed
09:04:37   From Brian Bertalot : What Tony said ^
09:04:50   From Paul Unsbee : These pictures tell a great story of the evolution and maturing of this program over of a relatively short time period!
09:05:23   From Liam Nance-Carroll : looking forward to seeing it IRL post pandemic
09:05:23   From Craig Jackson : We need to add the time they were in Milner Library to provide the full evolution of the program.
09:05:47   From Paul Unsbee : First picture in that line up was one of the Milner space they used
09:05:53   From Tony Brook : I'd love to share those pictures online to my social circles. Hopefully all these slides will be available afterwards as JPG?
09:06:05   From Liam Nance-Carroll : Needs to have a shoutout to Milner added to that pic
09:06:17   From Carla Birckelbaw : we can probably do that Tony
09:06:45   From Tyler Emken :   Hey Tony. Those pics were taken by my office and I have access to all of them.
09:07:24   From Liam Nance-Carroll : Can we get the photo story of this evolution on one of the Official Social Channels to share?
09:07:39   From Charles Edamala (CIO, Illinois State) : Specific shout out to Paul. He had to sell the idea to others at Milner who may not have been up on gaming :)
09:07:52   From Greg Maier : It's difficult to remember how young video games are as an (e)sport and/or artform
09:08:38   From Richie Szaflarski : So we've done a few upgrades but here are the current specs on the DIGGS machines:
CPU: i5-8400
RAM: 48GB
GPU: 1070 Ti
Storage: 1TB SSD
09:08:47   From Jennifer Friberg : You should talk to the SoTL peeps on campus to set up a study about this…see how involvement in Esports supports student success (academically, socially, personally, etc.)…there's not much out there about this yet!
09:08:55   From Shawn Treichel : that's an interesting amount of RAM
09:08:58   From Greg Maier : 48GB RAM!
09:09:12   From Cristian Sandu : you can basically learn frontend just from needing to know how to fully customize twitch layouts
09:09:22   From Justin Brutlag : With that much ram it could run vista!
09:09:43   From Tony Brook : One thing I am curious about is how developing this program has gone in the pandemic - keeping the students and support staff safe, especially with the space being so accessible. But I can ask about that offline. =)
09:10:53   From Tyler Hoobler : Vault PC specs:
Alienware Aurora R9
9th Gen Intel Core i7 9700K
32GB Dual Channel HyperX RAM at 2933Mhz
1TB M.2 SSD
NVIDIA GeForce RTX 2080 SUPER
Dark Side of the Moon Chassis, Liquid Cooled, 850W Power Supply

Alienware 25 Monitor – AW2518H
25", G-Sync, 240Hz, 1ms

09:11:16   From Charles Edamala (CIO, Illinois State) : Shout out to Richie and team for keeping the DIGGS up to date as a startup/incubator space. Now it pivots to a VR/XR development and high performance computing space
09:11:30   From Shawn Treichel : 2080 Super at 1080p must get pretty good frames
09:11:50   From Paul Unsbee : gotta push those 240hz monitors!
09:12:41   From Ron McGettrick : If we wanted to join your discord or twitch channels can you provide us your channel urls

09:12:45   From Cristian Sandu : links for discord, twitter, twitch?
09:13:32   From Paul Unsbee : http://discord.gg/redbirdesports
09:13:39   From Tyler Emken : https://news.illinoisstate.edu/2020/07/three-reasons-to-be-excited-for-redbird-esports-inaugural-season/
09:13:43   From Ron McGettrick : Thank you Paul
09:13:46   From Tyler Emken : All of the relevant links are in that story
09:14:11   From George Wiman : Renderings: Wow!
09:14:14   From Jonathon Neff : Ah, Counter-Strike.. I wish this was around when I was getting kicked from Counter-Strike servers (they thought I was cheating).. haha
09:14:34   From Patrick Griffith : Incredible..
09:14:48   From Melinda Potter : This looks amazing
09:14:54   From Paul Unsbee : holy moly. Any office space available? Where's that HR transfer form.....
09:15:04   From Brian Bertalot : soooo...where do faculty/staff sign-up? :P
09:15:21   From Liam Nance-Carroll : not a content question but a technical one, David, what mic setup are you using? Your audio is very good even with all of the compression from Zoom..
09:15:51   From Ben Rappleyea : Looks like a Sure SM-58
09:16:01   From Ben Rappleyea : sorry, shure
09:16:28   From Ben Rappleyea : Or some knockoff thereof ha ha
09:16:39   From Ron McGettrick : Do you ever offer local events / tournaments for local youth or high school that might be interested in your program in future.   I know that one of my kids are big in Fortnite and the other one in the competitive leagues Overwatch
09:17:00   From Casey Johnson (WORK) : Diversity within ESports is considered a challenge. How is ISU mindfully taking steps to increase the diversity within our own ESports program?
09:17:03   From Adam Listek : I have one of those, they work great for sound. Since they don't pick up a lot of ambient sound works well for these type of things.
09:17:09   From Todd Smoak : Red shirt freshman right here... maybe I can get a scholarship from Aspirin or Advil for this middle aged arthritis.
09:18:04   From Ben Rappleyea : What I call a spit/pop guard in front of the mic helps too
09:18:43   From Nathan Carpenter : Do you plan to integrate mass media academic programs to do content creation / broadcasting?
09:18:58   From Chad Muse : Very cool. Awesome work!
09:19:04   From Ian Bruckner : What units on campus collaborate or otherwise co-opt the program to further other academic aims? For example, School of Communication for broadcast?
09:19:05   From Jason Mays : twitch chat lol
09:19:06   From Colten Keeling : who's the student going to C9?
09:19:10   From Tyler Emken : Flagship social is starting a Tik Tok too. Some potential for collaboration?
09:19:13   From Nicholas Flamini : Tempos!
09:19:23   From Tyler Piper : @colten Tempos, first name is Spenser.
09:19:33   From Derek Story : ^^^ Great question Casey.
09:20:02   From Jeff Grabb : Great presentation! Really loving where all this is going, thanks for speaking with us!
09:20:17   From Craig Jackson : CFA/Creative Technologies is working with Esports Program.
09:20:30   From Ron McGettrick : Very Nice presentation.   Excited on Esports for ISU !
09:20:42   From David Kirk : Thanks everyone! Sorry have another zoom to head to!
09:22:21   From Tyler Piper : With more time someone should have put these into a Star Wars intro style video :)
09:22:53   From Jeff Grabb : @Tyler...it was suggested that we do the Star Wars crawl ;)
09:23:07   From George Wiman : 2nd vote for the Star Wars crawl...
09:23:11   From Paul Unsbee : Credit to Jeff Grabb for designing it
09:23:14   From Cristian Sandu : need a car vinyl/wrap
09:23:18   From Casey Johnson (WORK) : We could get a tapestry for Charlie's office??? ;)
09:23:25   From Paul Unsbee : ...There has been talk of posters
09:23:35   From Jennifer Friberg : Zoom background!
09:23:46   From Rachel Hart : Zoom Background is a great idea!
09:24:34   From Ben Rappleyea : https://www.bagsoflove.com/products/custom-printed-curtains
09:24:36   From Liam Nance-Carroll : great ideas on getting this out there to own our challenges and

accomplishments
09:25:54   From Charles Bristow : Zoom background with the Star Wars crawl.
09:26:03   From Tyler Piper : Every day around 11:30am someone comes to clean the door handle for my office and it took me about a week to stop thinking someone was trying to come in.
09:26:23   From Ben Rappleyea : lolz
09:29:25   From Jeff Grabb : Thanks, Charlie!
09:29:32   From Nathan Carpenter : Thanks, Charley!
09:30:00   From Rachal Roach : Networking and DataComm Wiring have been on campus keeping things running too! :)
09:30:18   From Liam Nance-Carroll : Thanks, Charley! That was very well said.
09:30:38   From Jeff Grabb : And wow do we appreciate it Rachel ;) Mad network props!
09:30:41   From Charles Edamala (CIO, Illinois State) : My bad, I knew I would forgot someone. I see the networking team on campus too
09:31:55   From Charles Edamala (CIO, Illinois State) : what is Tyler Hoobler's background?
09:33:11   From Tyler Hoobler : Thermonuclear Art https://svs.gsfc.nasa.gov/13057
09:33:40   From Charles Bristow : Wait REG doesn't mean ReggieNet?
09:34:40   From Charles Edamala (CIO, Illinois State) : Thanks, Tyler, it did look like the world blowing up :)
09:34:52   From Tony Brook : I use Feedly to aggregate my news stories. Since the upgrade to News.illinoisstate, I am getting quite a bit more ISU News stories, which is really cool. :)
09:36:28   From Arturo Ramirez : Awesome, great to know Tony!
09:36:28   From Matthew Gromer : That's a great idea, Tony! I've used Feedly for a while, but never thought of that...
09:36:43   From Charles Edamala (CIO, Illinois State) : Thanks for that MY work, Arturo and team. Remarkably fast work
09:39:31   From Arturo Ramirez : You bet! Forgot to mention that more information about Student Success support team will be coming up soon to list information about Milner subject librarians, Career Advisor, Financial Aid Counselor , etc. - students will be able to easily connect with their success team and we hope that will be key for retention and persistance
09:39:37   From Charles Edamala (CIO, Illinois State) : Thanks to Proctortrack, I got to address my very first protest group outside Hovey!!
09:40:28   From Casey Johnson (WORK) : Nearpod has been something that RSOs have leveraged for student meetings as well! I love it!!!
09:40:28   From Charles Bristow : I hesitate to imagine what they might have chanted.
09:41:02   From Jennifer Friberg : https://ctlt.illinoisstate.edu/technology/nearpod/
09:41:49   From Jennifer Friberg : We welcome IT folks in our trainings. As Rosie mentioned, 2 are planned for faculty prep week in January:
09:41:50   From Jennifer Friberg : https://ctlt.illinoisstate.edu/events/prepweek/
09:42:01   From Timothy Walsh : COE is using EdPuzzle, and it's been very successful, as far as I know.
09:42:09   From Timothy Walsh : (and Rosie hits that point)
09:45:47   From Charles Edamala (CIO, Illinois State) : Thank you, Rosie!
09:46:13   From Derek Story : Cue drum - rimshot!!!
09:46:15   From George Wiman : LOL
09:46:37   From Carla Birckelbaw : too soon Todd
09:46:44   From Tony Brook : ...
09:47:09   From Paul Unsbee : For the record, I do not own the monopoly on bow ties! #trendsetter
09:47:09   From Jeff Grabb : Looking for that cruisemissile.illinoisstate.edu app for circumstances just like that one...
09:47:10   From Tyler Piper : funny enough. Solid dating profile into.
09:47:55   From George Wiman : Paul, the trouble is none of the rest of us can make one look as good as you do
09:48:13   From Tyler Piper : lol
09:48:13   From Adam Listek : What's the name of the product?
09:48:16   From Charles Edamala (CIO, Illinois State) : Thanks, Todd
09:48:28   From Charles Edamala (CIO, Illinois State) : Kuali Workflow
09:48:38   From Adam Listek : Ok, I thought that was it, but couldn't recall!

09:48:57   From Tony Brook : It really is impressive.
09:49:05   From Paul Unsbee : Agreed.
09:49:17   From Tony Brook : And all signs point to it scaling and integration with our systems well.
09:50:48   From Liam Nance-Carroll : Do their update servers use kuali123 as the password to cue new updates?
09:51:07   From Charles Edamala (CIO, Illinois State) : Laim, too soon, too soon
09:51:20   From Todd Smoak : The ink isn't all done yet, which is why I didn't want to put the name into the presentation in case Kevin Hand still needs to further leverage negotiations...
09:51:44   From Elizabeth Giller : I love your festive background Rachel!
09:51:58   From Charles Edamala (CIO, Illinois State) : Thank you, Rachel
09:52:09   From Rachel Hart : Thank Liz!
09:53:20   From Ron McGettrick : Nice Job Rachel and EDA team on the new dashboard looks really nice and I am sure will be helpful for leaders on campus !
09:53:44   From Melinda Potter : On our way now!
09:53:55   From Melinda Potter : Endpoint is very excited about it
09:55:16   From Charles Edamala (CIO, Illinois State) : I have to leave for another meeting but should be back after,
09:55:59   From Kevin Hand : Same, my meeting is just way less important than Charley's
09:56:36   From George Wiman : This looks like a huge improvement
09:57:37   From Skylier Wallace : 30,000
09:57:37   From Charles Bristow : 32K
09:57:38   From Tyler Hoobler : 30,000
09:57:40   From Kevin Selinger : 40k
09:57:40   From Ron McGettrick : up
09:57:41   From Rachel Hart : 40K
09:57:41   From Kristen Grimes : way up!
09:57:41   From Jennifer Friberg : 32k
09:57:42   From Derek Story : $1
09:57:49   From Liam Nance-Carroll : 28K
09:57:53   From Eric Schuller : just way up. double?
09:57:55   From Elizabeth Giller : I concur...$1
09:57:58   From Nathan Stien : derek with the price is right answer
09:58:12   From Jennifer Friberg : Wow!!
09:58:48   From Rachel Hart : well done TSC!
09:59:14   From Liam Nance-Carroll : Impressive work Tyler and crew!
09:59:31   From Kristen Grimes : I'm really happy about that service catalog!
10:00:08   From Liam Nance-Carroll : Can we get an grand total for all the tickets closed in 2020 by all areas?
10:00:51   From Ben Rappleyea : the who?
10:00:52   From Ben Rappleyea : AT?
10:04:44   From Tyler Piper : Campus Wide Ticket Closure Data:
2019: 67,541
2020: 69,617
10:08:08   From Paul Unsbee : Here's the bow tie y'all missed out on today while I vacations in a USPS facility in Michigan.

https://www.etsy.com/listing/527582127/donkey-kong-bow-tie-nintendo-bowtie-nes

Don't worry, It'll make an appearance at a later CIT!
10:11:19   From Carla Birckelbaw : Craig is bringing the Christmas spirit
10:11:24   From Jeff Grabb : Is that really a giant Squirrel!?!!?!?
10:11:25   From Derek Story : Love the squirrel, and the fire
10:11:28   From Cristian Sandu : we're not gonna talk abotu the giant squirrel?
10:11:28   From George Wiman : Squirrel!
10:11:29   From Derek Story : Where is the leather bound book
10:11:33   From Chandra Smith : Bahahahaha Craig
10:11:34   From Cristian Sandu : oh okay cools

10:11:44   From Ron McGettrick : Very Christmas theme Craig !
10:12:34   From Liam Nance-Carroll : That Squirrel is slightly terrifying
10:12:52   From Shawn Treichel : they sure look nutty
10:13:33   From Melinda Potter : Craig if you go missing I'll know it was that squirrel
10:13:58   From Ben Rappleyea : Not the only ones!
10:13:58   From Casey Johnson (WORK) : The squirrel is always watching...
10:14:01   From Nathan Stien : OpenShift is awesome, we love it
10:14:33   From Tim Flynn : The squirrels eyes are following me...
10:16:55   From Paul Unsbee : That is awesome!
10:17:06   From George Wiman : High Perform computing session at same time as mine... I will definitely be looking for the video!
10:17:24   From Nathan Stien : Since moving to OpenShift, we have improved integrations reliability and streamlined many of our processes; our deployments are all described declaratively in yaml and go through GitLab CI pipelines. This has also permitted us to transition to structured logging and other modern niceties.
10:17:50   From Carla Birckelbaw : we will be posting recording of all sessions to the CIT web site, so don't sweat your choices too much today!
10:18:07   From Derek Story : Tim - SYSK has a nice Short Stuff podcast on why eyes follow you in 2D https://play.acast.com/s/stuffyoushouldknow/c89cfb7a-3620-11ea-b32d-b3f821e576ee
10:20:00   From Joshua Durst : I can't tell if Dan has a much better camera than everyone else or if he has a professional lighting crew
10:20:07   From Tyler Piper : 100%
10:20:19   From Tyler Piper : I meant to ask him what he's using.
10:20:25   From Matt Lindstrom : It must be his League of Legends streaming setup
10:20:57   From Tim Flynn : aura of security
10:21:11   From Liam Nance-Carroll : Dan's video setup with David's audio would be a very nice setup
10:22:03   From Paul Unsbee : The CIA, NSA, and FBI have all pitched in to keep high quality cameras (and lighting) on Dan for security purposes.
10:22:05   From Tyler Piper : I was thinking you tube. 'Hey it's ISU Dan back again with another League mid-lane guide. Don't forget to subscribe and configure MFA on all of your accounts.'
10:22:09   From Carla Birckelbaw : there are 100% less dogs than usual in Dan's feed though, which I regret
10:22:48   From Rachal Roach : lol Carla. They are fun to watch!
10:23:21   From Tyler Piper : We need more pet guest appearances in general here. Please take this as feedback for the next CIT.
10:23:47   From Rachel Hart : we should do a Watercooler Chat with our pets
10:24:27   From Mike Mansfield : I feel like my pets make random dive-bomb appearances in most of my meetings :)
10:24:58   From Carla Birckelbaw : seeing everyone's pets is one of the (good) unintended consequences of COVID
10:25:14   From Liam Nance-Carroll : MFA is going to be a massive pain but ultimately worth it
10:26:36   From Adam Listek : I've been using it for about a week or so and works pretty easily here. Like every other one.
10:27:10   From Jeff Grabb : MFA for me has only had one glitch...otherwise, it's been pretty solid.
10:27:56   From Liam Nance-Carroll : I am thinking more of the challenges around a handful of faculty that are challenging on the best of days when it comes to the use of new technology and changes
10:28:12   From Ben Rappleyea : @Jeff Grabb what issues have you encountered? What did you need to do to get past them?
10:28:31   From Tyler Piper : If you have ANY questions about MFA please contact the TSC. 1. We should be able to assist with anything you need and 2. we appreciate the support experience.
10:29:17   From Jeff Grabb : I had a couple of prompts from apps be delayed for some reason that make them seem out of sync with a request...but it was only one afternoon and a couple of times
10:29:46   From Craig Jackson : CIS controls is with HPC!
10:30:35   From George Wiman : Drum roll...
10:32:34   From Christopher Johnson : Great nominations! :-)
10:32:52   From Adam Listek : Congrats!
10:32:55   From Rosie Hauck : Woo-hoo! Congrats, Melinda!
10:33:04   From Bill Hamann : Congrats, Melinda!

10:33:05　　From　Lawson Cassels : Way to go Melinda!
10:33:10　　From　Jeff Grabb : Congrats, Melinda!
10:33:15　　From　Christopher Johnson : Congrats!!! Melinda! :-)
10:33:37　　From　Brian Smiser : Been working with Arnold lately for the first time. He's been great. Well deserved nomination!
10:33:43　　From　Tyler Hoobler : Now go wash your hands.
10:34:29　　From　Liam Nance-Carroll : Congratulations, Melinda! and yes please wash you hands.
10:35:30　　From　Timothy Walsh : Congratulations!
10:37:53　　From　Jeff Grabb : NOMINATE YOUR FOLKS...we're not being subtle here...N-O-M-I-N-A-T-E ;)
10:39:13　　From　Charles Bristow : Also, Tom Silvia from CTLT (Opscan and website manager) has retired recently.
10:39:39　　From　Liam Nance-Carroll : Congratulations to those retiring!
10:39:45　　From　Carla Birckelbaw : thanks for being the host with the most, Paul!
10:39:59　　From　Rachel Hart : second that - Great Job Paul!
10:40:02　　From　Tony Brook : … Thanks, Paul...
10:40:06　　From　Bill Hamann : Yes, thanks for hosting Paul!
10:40:15　　From　Rosie Hauck : Bravo, Paul!
10:40:18　　From　Skylier Wallace : Thank you Paul!
10:40:19　　From　Tony Brook : Oh, yeah, non-sarcastic thanks. =P
10:40:21　　From　Nathan Stien : Thanks to Paul but he really better have that donkey kong bow tie next time
10:41:30　　From　Chandra Smith : Thank you all!
10:41:33　　From　Jeff Grabb : Stay safe all!
10:41:35　　From　Charles Bristow : Why is my name on that slide?
10:41:37　　From　Jennifer Friberg : Thanks, all!
10:41:40　　From　Dongli Zhang : Thanks!
10:41:40　　From　Dan Taube : Thank you!
